

# Lawn Mower Parts Stamping

## DATASHEET

D&H Industries is a precision metal stamping and fabrication shop specializing in lawn mower parts and assemblies. We have the expertise to form components constructed from steel and aluminum with complex geometry to meet or exceed the most demanding tolerances. Our services include large format and progressive stamping, laser cutting, press brake forming, tube bending, and large format robotic MIG welding.

From garden tractor to rototiller assemblies, D&H Industries is at the ready to help you manufacture. We bring projects from concept to reality with a deep bench of engineering and tool room talent. D&H offers a one-stop shop to get your new lawn and garden ideas powered up with complete design capabilities, machining, and assembly of new tools. We are a trusted Tier 1 supplier of high-quality prototypes and high-volume precision metal components to leading OEMs across many industry sectors.

### Part Types:

- Frame
- Hood
- Fender
- Mower Deck
- Grille
- Brackets
- Foot Rests
- Assorted Panels and Covers

**Industry Applications:** Lawn and Garden
