

D&H Industries Line Card

D&H Industries is an industry-leading innovator of precision stampings and fabrications specializing in progressive and deep-drawn stamping, automated manufacturing, metal forming, traditional and robotic welding, and value-added assembly. We continue to invest in state-of-the-art technologies in our two manufacturing facilities in Oconomowoc, WI serving both US and international customers.

Metalworking Materials

- Metal Types: Low carbon, draw quality high-strength low alloy steel, coated steel, stainless steel, PVC-covered stainless steel, aluminum, brass, copper, and a variety of exotic materials
- Metal Conversion: Coil, sheet, and blanks from .015" to over .500" thickness

Progressive Stamping

- 100 to 2,000-ton presses
- Up to .500" thick metal
- Up to 38" coil width

Large Part Stamping

- 300 to 2,000-ton presses
- Up to 60" x 144" beds
- Cell and automation mfg

Deep Draw Stamping

- 1,000 to 2,000-ton presses
- Up to 11" drawn depths
- Vast material experience

Laser Cutting

- 6,000-watt laser
- Cuts up to 1" thick
- Up to 157" x 78" sheet

Welding Fabrication

- Laser welding
- Robotic turntable cells
- Resistance and MIG

Automation

- Lrg robotic transfer systems
- Collaborative robotic transfer
- ABB weld cells vision systems

Assembly

- Simple to complex multi-level assemblies
- Weld and fastened

Samples | Prototypes

- Tooling design
- 1/4 scale to full-size samples
- FEA and mechanical testing

New Tooling | Transfers

- In-house tooling service – 2 designers | 14 tool makers
- Vast tool transfer experience

Engineering

- Product development – 5 in-house engineers
- Reverse engineering

Quality | Certifications

- ISO 9001:2015 certified
- CMMs | FaroArm scanning
- ITAR registered manufacturer
